**Pattern 8**—Gimps supported by temp. pin.

**Working diagram.**

**Passing a gimp when it doubles back between 2 rows of pins.**

Pass the gimp in the normal way to the last row of pins. Place the temp. pin, twist the top pair once then pass the gimp back down the row without further twists.

**Gimp temp. support pins.**

The temp. support pins must be placed almost in line with the row of pin-holes. See diagram. Above X.
